Wake up in the sky, have you ever seen the stars so
bright?
Ha, just go ahead make a wish all you gotta do is close
your eyes
This is, history in the making,
It couldn't be a moment bigger than this
This is where we learn to fly
Going party for tonight
This feeling is more than real
And right I don't want a dream
This is more than just the opening scene

[Chorus]

Looks like we made it
Put the champagne bottles in the air cause we made it
We made it
Looks like we made it
Just throw your champagne bottles in the air
Cause we made it, we made it
Looks like we made it

Have you felt love or have you felt hate?
Have you met joy or have you met pain?
It's what you gotta go through to see your better days
And I could tell you now that I have been through
everything
Put one finger in the air for that first place
And now I gotta admit nobody else can get a taste
Floating on super cloud 9 with them better wrist
Party all night while we young and we got a chance
So toast one up that we here, we made it
And smoke one up, cause it took a while to take it
Mama... was a long time waiting
But I came out just to be the greatest

[Chorus]

Looks like we made it
Put the champagne bottles in the air cause we made it
We made it
Looks like we made it
Just throw your champagne bottles in the air

Cause we made it, we made it
Looks like we made it

So just go ahead fall,
With the kings of this mountain
Now the world is to see it
Where the champions, oh,
I hear them screaming my name
We're here to stay
It's a brand new day cause it

[Chorus]

Looks like we made it
Put the champagne bottles in the air cause we made it
We made it
Looks like we made it
Just throw your champagne bottles in the air
Cause we made it, we made it
Looks like we made it
Yeah, we made it, made it, yeah
Oh, have you ever seen the stars so bright,
All you gotta do is close your eyes
