"Art Is Futile"

No experts to spreads message
No sticker can substitute discourse
How easy is to bring the counter culture
To the massive, crowded department stores.

All you fake is one direction and one end,
You cannot reduce us, seduce us, oblige us to
assimilate.
And you fake you have the answers to that quest,

You might think you're free, yes, you are free in a
Desert.

Some say that art is futile
Let's redefine what art should be.

I see the world is in decay
Let's take the right tools to create
New images.
