I need you (3x)

Girl, you're treating me like a fool
Sometimes you can be so cruel
But I know deep down in my heart
Your love for me will never part

Chorus:

I need you to hold on to
Tonight's the night
Lets get together
I feel right when your in sight
I know our love will last forever

Now, relationships breaking each day
Some people's love just runs astray
But I know that our love is true
So now I am asking you

Chorus

I need you (5x)
Lets get together
I need you (4x)

I realize that you are my fantasy
You are my fantasy
When we make love, you bring me ecstasy
You bring me ecstasy

Now, temptations they pass our away
But our love grows stronger each day
I know that deep down in your heart
Your love for me will never part

Chorus (3x)
