Come in close to me and bring me joy  
Lift me higher, much higher and higher than light  
allows  
I wanted to be everything, everything for you  
Well I wanted you, I needed you, I thought that you did  
too  
You built me beauty and took it all away  
And I can't face another day

I'd die for you today x 4  
(And took it all away)

Tempt me, sweet tempest - And shower me with stars  
I want to be as beautiful as you  
Take me to the summit and show me  
Show me all that I could ever have  
You brought me everything, I ever thought I wanted

And now you take it all away  
You have me love and then you killed me blindly  
I think I'll die for you today, I can't persue another way

I'd die for you today x 4  
(And took it all away)

Like a garden growin' in flames  
A forest filled with fear of the wind  
Like the moon so beautiful from afar  
But shattered on the surface, full of scars  
A sea with no more fish, planets without air  
Whales with no more song  
I know I'm gonna die with them today

I'll die for you today x 5  
(And took it all away)
