"Leave It"

Yeahhhhhhhhhh

Love was just a game for you
A simple word you silly you
Trust that was an unknown word
It must be really lonely being you

I feel sorry for you
You haven't got a clue what you've lost
You're not worth this crying
We quit when you're dying
If you leave me now you pay for that right now
Leave it now - peg out

Heartbeats torn inside my head
No need for speed just feel the dread
Late night walk it's me nor you
Late night talk I want a word with you

I ain't in a mood for this
You better get this story straight
I don't believe this shit
Don t wanna love a fake
