Oh what a plain necessity to be alive  
Always too soon to criticise  
I have had under my eyes and nose  
My mouth singing me lullabies

I have no right to complain that I am alone  
And have no-one permanently  
But if one takes it by the hand the funny man laughs  
Forever landing them on me

Oh what a plain necessity to be alive  
Always too soon to criticise  
I have had under my eyes and nose  
My mouth singing me lullabies

I have no right to complain that I am alone  
And have no-one permanently  
But if one takes it by the hand the funny man laughs  
Forever landing them on me

Biting while cutting deep m  
M akes me end up with a clean sweep  
Making all my fears  
Completely dissolve away  
The saving up for the hope day disappears (get off)

It's funny how when you breathe in  
Your mouth opens air goes in  
She won't boil using Teflon on her  
Should I go and put the kettle on her

Michael's got himself a girlfriend he's a lucky fellow  
Katy's top was as white as ever but now it's gone all  
Yellow  
Malcolm's a bastard and keeps acting like Emperor  
Nero  
Peter is constantly pretending to be a super hero

But what's in a name la la la la  
What's in a name la la la la  
What's in a name la la la la

What's in a name la la la la

Biting while cutting deep  
Makes me end up with a clean sweep  
Making all my fears  
Completely dissolve away  
The saving up for the hope day disappears

The funny man hiding something  
Hands me one thing trying not to laugh  
Then he gives me news of an epitaph  
For the creatures dying in my bath

Tracy is turning and revolving in a city lining  
Martin keeps his new Lambretta gleaming and shining  
All news has it's way then leaves me staring at my  
Pillow  
All clouds have a silver lining gleaming and shining

All of the time  
On the Siegfried Line

All news has it's way then leaves me staring at my  
Pillow  
All clouds have a silver lining gleaming and shining
