"Nationalism And Heritage"

Our dedication to our homeland
Strength of the blood, victorious we stand
Follow the path of ancestral rights
The future forged in our purity
Snowfalls, our land turns white
Burn the cloud of mongrelism
Freedom for both folk and future
May our bloodlines be secured
Segregate and devastate
Fists of the destroyers without mercy
May the fist burn in our hearts
And reduce the weak to ash
Sounds of the future whispered on icy winds
For the legacy of our forefathers
For lands which they fought for and founded
For our children and for our culture
For Nationalism and Heritage
Nationalism and Heritage
