All around us and in between
Politics like cancer
Information in extremes
Never find the answers

Events unfolded
Set the stage
We know they have us
In every way

They held a grudge
For way too long
I feel that danger
Coming on

I have grave expectations
For this strange situation
I signed my letter of resignation
For the stealing of a nation

Cut your losses
Get the votes
Come fall, they'll change
Every single quote

Heavy ammunition
Targets in sight
Inhuman nature
Fills me with fright

Do your life justice
It won't take long
