Freddie I know
When your time comes it won't be pretty, no
You reap what you sow

You and your friends
The Trojan horse you came in left a stench
A carcass in the trench

Freddie one day
All the workers that you led astray
Will make you pay

Oh Freddie, you should know
Can't punish people 'cause your hair won't grow
It's alright, just let go

Freddie, I know
You waved a banner at our latest show
How so?

And why not the expected slander?
You made me feel like Zara Leander
Just let us go, just let us go
Just let us go, just let us go
