Well then you thought that the end was in sight
And then you thought there was nothing to fight
But you had opened your heart with your mind
Ooh here comes one
And you were searching for something to give
And you were searching for some way to live
But you had opened your heart with your mind
Ooh here comes one

Oh you walking down the street and you work so hard
Let me tell you
Here comes one
Ooh here comes one
Ooh here comes one
Ooh here comes one

And you were hoping that things would go right
And you were hoping that day could be night
But you had opened your heart with your mind
Ooh here comes one

And you were searching for something to say
And you were hoping you'd find a new way
But you had opened your heart with your mind
Ooh here comes one
Ooh here comes one

Oh you walking down the street and you work so hard
Let me tell you
Here comes one
Ooh here comes one
Ooh here comes one
Ooh here comes one

Use your heart will decide, decide
Use your heart will decide, decide
Use your heart will decide
