

Rad Kick "Look around"

Visit "[Look around](#)" on MotoLyrics.com

You woke up from nightmares torture
And you can still smell this breath
It's so dark you're totally blind
Are you on your own? Be careful!
Somebody is watching you or is it you

When you're feeling down - and noone is around
Can you still hear this sound look around look around

You're closer than ever before
it's colder much colder now in here
It is your time this is your death you saw yourself
On your bed a pillbox next to you with sleeping tablets

When you're feeling down - when you're down on the
ground
And there's nothing to count look around look around
