Dogs from the waste land

1.

Dogs from the wasteland are chasing tonight  
Filthy and wired they heading for your part of town

Where they come from the sun never shines  
The streets are loaded with people losing their minds

Losing their minds

2.

Lords of the desperate are searching tonight  
From a distance see them thrashing around

Don't know what they want but they need it bad  
See the disease in their eyes it glows in the night

It glows in the night

Stick:

Helicopters in the air / sirens in the skies  
City walls shake / from the terrible sound

3.

Assembly of the restless increasing your fear  
Screaming creatures torture your ears

Dogs from the wasteland rumble in sight  
Hunting you down in the neon light  
Don't try to run you can't hide  
They crushing in like a tide  
Wherever you are whatever you are  
It's one of those nights it's bizarre

Dogs from the wasteland, dogs from the wasteland
