"Before The Storm"

Visit "[Before The Storm](#)" on MotoLyrics.com

Who's such a fool to destroy himself?
Who still believe he could rule the world?
But after all, they invent the ultimate war machines
Declaring war on the world from space, a star war

Tell the world is for protection, nothing can go wrong
They wouldn't ever confess what their real intention is

Before the storm we're prepared for the fall
So many lives with no future at all
Before the storm, now they chime in the end
Death and destruction will come from their hands

Shake hands and smile in the camera's eye
But coming near there's eagerness in their eyes

They are under the command of hunger for the gold
The poisoned sting of power jabs in their veins like a bolt

Before the storm we're prepared for the fall
So many lives with no future at all
Before the storm, now they chime in the end
Death and destruction will come from their hands

(The secret affair) we don't know what we know
(The secret affair) the tradition of death must go on

Tell the world it's for protection, nothing can go wrong
They wouldn't ever confess what their real intention is

Before the storm we're prepared for the fall
So many lives with no future at all
Before the storm, now they chime in the end
Death and destruction will come from their hands
