We send satellites to space  
And we own the biggest missiles  
We give millions of support for technology  
But still we can't even live in peace with our neighbor  
Most of us are insane of neuroses

Enough is enough, you can control  
Enough is enough, those who don't know

Faster, this world is heading straight into a big disaster  
Tell me, when will it reach its end?  
Bigger when moneymakers stamp our souls with  
technology  
Believe me, this got to reach an end  
All this misery in our minds will break free, you will see,  
yeah, oh

Social psychology, seek the key for our salvation  
This science needs more support, it could help that  
The understanding of the single person can grow  
But who pays 'cause if we stay weak, we are much  
better to use

Enough is enough, head over heart, huh  
Enough is enough, right from the start, yeah

Faster, this world is heading straight into a big disaster  
Tell me, when will it reach its end?  
Bigger when moneymakers stamp our souls with  
technology  
Believe me, this got to reach an end  
All this misery in our minds will break free, you will see

Science is only as good or as bad as the people who  
use it  
And if we want to have a tomorrow  
We should take ten percent of the money from our  
armies  
And develop the minds of our nations

Enough is enough, you can control  
Enough is enough, those who don't know, yeah

Faster, this world is heading straight into a big disaster  
Tell me, when will it reach its end?  
Bigger when moneymakers stamp our souls with  
technology  
Believe me, this got to reach an end

Faster, a victory about fear, this is the greatest glory  
Believe me, the first step has been made, made  
Bigger, the real progress, another quality in our way of  
life  
From quantity to quality  
Away from misery in our minds, make them free

It's got to be, it's got to be  
It's got to be, it's got to be  
It's got to be, it's got to be  
[Incomprehensible]  
It's got to be, yeah
