Awakening this curse
Was the least of all my fears
If I could turn back time
To free me from this crime, yeah

A nameless time

It started back in time
When something stole my mind
And led me through aeon's
To place and time unknown, yeah

I lived their life, lost in their time, without my face

Take me back home from these cryptic walls
I wait for a sign from my own reality
I wait here in a nameless time

A certain time passed by
I returned to my life
With memories hard to find
A secret in my mind, yeah

I found it out, I've learned about the place I've been

Take me away to these cryptic walls
I wait for a sign from this old reality
It calls me from a nameless time

Take me back to these cryptic walls
To this desert place and this strange reality
It calls me from a nameless time

I've

I broke up to find this place, find those from the elder
race
In this unknown desert land, I was digging in the sand
Found these ruins, blocks of stone, older than the
Egypt ones
Climbed in caves, unspeakable, far down in the planets
depths

There were these enchanted books, pages that I've
known too well
Written by the aliens 'bout the way their study's been
They transformed through space and time in all kinds
of living minds
Learning this way everything how through times the
culture's been

And I imagined how it's been like traveling through a
nameless time
And I remembered how I felt when I was
In a nameless time, in a nameless time, in a nameless
time
In a nameless time

Take me home from these cryptic vaults
I wait for a sign from my own reality
I wait here in a nameless time

Although the most I knew
I needed a final proof
If I'd been one of them
And then these pages came

My written words, so I'd been here in one of them

Take me back home from these cryptic vaults
'Cause I've been alive in this strange reality
Release me from this nameless time

Take me home from these cryptic vaults
I'm cursed for all time in this strange reality
Release me from this nameless time

And all time
And all time
