Visit "[Love After Death](#)" on [MotoLyrics.com](http://MotoLyrics.com)

All I want is you  
But so far I never knew you  
Our limitless selves  
All that can remain is there

Now give us the time to share it  
'Til the sleep comes again

Love after death  
The other half in a unit we're best  
Love after death  
This is forever, I have no regrets

Lost out of my sight  
Alone wandering through the night  
Time tore us apart  
So different to learn by heart

Now give us a chance to share it  
As life comes again

Love after death  
The other half in a unit we're best  
Love after death  
This is forever, I have no regrets

Love after, love after death

Love, all I want is you  
I am just like you, never we can die  
Love, circle in a whole  
The twin of my soul 'til the end of time

Love after death  
The other half in a unit we're best  
Love after death  
This is forever, I have no regrets after death

Love after, love after, love after death
