"Fall"

Visit "[Fall](#)" on MotoLyrics.com

Pathetic sympathies
Left for the bloody at heart
Everything fades to shit
Everything tears me apart

Caustic insecurities
Surface above the withheld
Everytime I need
Everything I want

Aesthetic disguises
Confuse easier tasks
Underlying doubts
And my direction dies

Everything's right up in your face
Everyone's right up in front
Push me against the wall
But still you can't make me

Fall
You can't make me
Fall
You can't make me
Fall
You can't make me
Fall
Separate your mouth
Scrape away

Prosthetic misery
Idiosyncratic
Pushing me to never
Hold my breath

Synthetic misuses
Dragging me higher still
You never brought me to
And still you push me back

Anemic discipline

Produces bad thoughts
Everybody's wrong
Everybody's too strong

Everything's right up in your face
Everyone's right up in front
Push me against the wall
But still you can't make me

Fall
You can't make me
Fall
You can't make me
Fall
You can't make me
Fall
Separate your mouth
Scrape away your skin
Separate your mouth
Scrape away your skin

I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all

I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all

I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all
I don't like you at all, I don't like you at all
