Remember i told you "in life and death"
Don't bury our secrets
They will not tear us apart
Because love means going this far
Even when the ending is only the start

If you dive into the ocean then i
Will be the wave around you tonight
And if you're sinking, then oh, it's alright
Because i will be the ghost who is at your side

Remember, you're demons will surface and fight
But i will be a good phantom
And keep on romancing this cold little devils tribe
And hold them away while you are escaping into the
light

So tell me where you've gone by now
I'm getting no reception on my heart radio
Now meet me where the angels collide
And i will be the ghost who is at your side

Yeah
Now i'm changing, i'm changing, i'm changing
Oh i'm changing for you now

When you dive into the ocean alive
Oh i will be the ghost at your side
If you fall into the devils tribe
Oh i will be the ghost at your side
And when anywhere the angels collide
Oh i will be the ghost at your side

Now dive into the blinding light
