"What If We"

Visit "[What If We](#)" on MotoLyrics.com

If you were single and time was in our favor
Life would be much different, much different for you
and me
Cause baby you're the flavor my love taste buds have
been thirsting for
Hand crafted by the lord
Maybe that's why I paint pictures in my head like

What if our
What if our eyes locked
And what if we
What if we danced and we stopped
And you took my number and we hooked up baby
And what if we talked the next day
And what if you came around my way
Like the perfect story with no end (No end)
Oh you got me chasing time (I know you hear me like)
Hear me trying to keep up

I see me getting with you
And me staying with you
Wish it wasn't so hard to get you
You got me talking to myself like

What if our
What if our eyes locked
And what if we
What if we danced and when the music stopped
You stepped out on faith and gave me your number
and I called you baby
And what if we talked the next day (Oh)
And what if you came around my way (Baby listen
you've got me chasing time)
Like the perfect story with no end
Oh you got me chasing time (Like a dreamer baby)
Hear me trying to keep up (You got me asking myself)

What if our
What if our eyes locked
And what if we
What if we danced and when the music stopped
We stepped out on faith, exchanged numbers and

talked baby
And what if we talked the next day
And what if you came around my way (What if)
Like the perfect story with no end
Oh you got me chasing time (You got me chasing you)
Hear me trying to keep up

I want you, wish I could have you, why can't I have you
and I want you(2x)

(What if) What if I our
What if our eyes locked
And what if we
What if we danced and when the music stopped
We got the nerve to exchange numbers
And what if we talked the next day (What is we talked
the next day)
And what if you came around my way (And what if you
came around my way)
Like the perfect story with no end (Oh baby)
Oh you got me chasing time (You got me oh you got
me)
Hear me trying to keep up

What if I..... And what if we parentheses
