Just while love, just while love, just while love
remembers
Just while love, just while love, just while love
remembers

Unknow me as hard as it seems
Decide it and feel light on the breeze
And it's alright, you can lean it, you can lean it... on me
And I know it's all you can see and to shake it
To make it fall from the tree
And you're called into the water
And it holds you like a tropical disease
And you lean into the weather and it drops you, drops
you

Just while love remembers
I was given these lungs
And I won't be ashamed no more
We were ripped from those arms
They no longer protect us
[x2]

Unknow me pour me away [x2]

Just while love remembers
I was given these lungs
And I won't be ashamed no more
We were ripped from those arms
They no longer protect us
[x2]

Just while love, just while love remembers
Just while love, just while love remembers
Just while love, just while love remembers
