# "Generation"

Visit "[Generation](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Your choose to face the world  
With a gun in your hand  
A cruel reality you just don't understand  
By following these trends  
This gangster shit is in  
By playing it blind you overcome your sins  
Generetion  
Unfortunately my brother you didn't reach the surface  
Backed up against the walls of life said Fuck the justice  
Your ways of dealing with it have always paid the bills  
No matter how far the stetch cuz you have to got the  
skills  
From the left to the right You failed to see the light  
Now from A State pen cell  
Nobody shines  
We're talking about a motion Of a new generetion  
You better make your moves fast  
This is your life son  
Give it up, Give it back  
Drop the attitude and be yourself  
Of course you're always thinking about getting some  
more  
Your beat of life has costed you more that You could  
really afford  
Now straight-up and face the truth  
You're losing your mind by trying to be another player  
You'll just and up inside  
Chorus  
From many point of view we're moving forward...  
But from many other points of view We're going  
backwards
