Good (for a woman)
Leather skin
Lately it's what i've been thinking about
This alien girl from above
We can share our love
I got it good for a woman
She's something else
She's not quite human

I got it good for a woman
She's something else
She's not quite human... Human

Venusian queen
You're so bright the sun gets mean
I swear it's a dream
But i pinch myself and your still green
I got it good for a woman
She's something else
She's not quite human
I'm head over heels for a space case
Stars in her eyes and love on her face
I got it good for a woman
She's something else
She's not quite human
My head's spinning
Around the world and back again

My head's spinning
Around the world and back again

I got it good for a woman
She's something else
She's not quite human

I got it good for a woman
She's something else
She's not quite human
