Bear your fangs -- To show you're in the mood
I've got your innocence -- Hanging from a noose
Now's the time to set things clear
Oh my love -- Come over here

It hurts you if it likes hold on tight and bite your pillow
These late nights and these fireflies ignite and light
your silhouette

Look me in the eyes -- Kiss me with your sugar tongue
Red lipped nurse -- Brought me back to life
Now's the time to set things clear
Oh my love -- Come over here

It hurts you if it likes hold on tight and bite your pillow
These late nights and these fireflies ignite and light
your silhouette

A little pain goes a long way -- A little lust makes you go
insane
