Cold affection
Thoughts we never could mention
One-word conversations
With all that we have now

Oh, I still remember that night in the park
When you held my hand in the dark
Over a blanket under the stars

We were in love
But look at us now
Look at us now
Look at us now

Oh, I still remember that night in the park
When you held my hand in the dark
Over a blanket under the stars

We were in love
Look at us now
Look at us now
Look at us now
