If you know me keep in touch
Don't neglect where there is love
When your way seems sometimes rough
If there's songs to be sung
Keep them up, keep them up

I'm still the same today as I was on the day when we
first met
I'm more than found forgiveness
I wanna be your friend
I saw your face when I placed the stars
Knew your name, your hopes, your fear
And every time you walked away
I was always there

If you're poorly
If you're down
Need some comfort?
I'm around
When your flame seems all but out
I can spark a fire like the one that you first felt

I'm still the same today as I was on the day when we
first met
I'm more than found forgiveness
I wanna be your friend
I saw your face when I placed the stars
Knew your name, your hopes, your fear
And every time you walked away
I was always there

And nothing can take away
No one will ever break
Nothing can erase
No one will ever shake
This Love
