

Raised Fist "Go Away"

Your ego's stepping on my toes
Never been this close to sin even though I don't believe
in symbols
You have to answer for yourself
Hate combined with ignorance makes one furious

(Go away)
Go away
We don't like you
Full of shit and so are your friends too

What I mean this time you'll never understand
Been together this long, this will never end
And you're so brave behind your friends
Insecure and lost [Incomprehensible] of the loose ends

(Go away)
Go away
We don't like you
Full of shit and so are your friends too

And you're so brave behind your friends
Standing in the middle of the loose ends
Answering for yourself in every single way
I don't care about what your ugly mouth say

And you're so brave behind your friends
Standing in the middle of the loose ends
Answering for yourself in every single way
I don't care about what your ugly mouth say

And you're so brave behind your friends
Standing in the middle of the loose ends
Answering for yourself in every single way
I don't care about what your ugly mouth say
