

Raise Hell

"Black Visions"

Visit "[Black Visions](#)" on MotoLyrics.com

Black visions through my eyes, like tunnels in
demoniac laughter
One with the night, I crushed the gates into this
dimension in red
With red bursting eyes - I stare so silent and cold
I kissed you goodbye, left you alone
Nightspirit take me home
With wings on a track and stars by my side
We end on a higher level
Take my hand and come along
Black visions in my mind, like memories in bitter
darkness
One with the night, I struggled to stay with the demons
inside
With red bursting eyes - I stare so silent and cold

I kissed you goodbye, left you alone
Nightspirit take me home
With wings on a track and stars by my side
We end on a higher level
Help me solve the cosmic black
Come along and let us escape
Into this voyage in rapture
Into a hole, something tears my flesh
Demonic beasts calls my name
One with the night, stars by my side
I hunt for visions so black
With wings on a track and stars by my side
We end on a higher level
Help me solve the cosmic black.
