At dawn  
As the silence betrays  
We're afraid of our fear...  
We sway and  
Suddenly once again strangely  
We regret...

The visions fevered, exotic sorrows restrained  
obsessions all come to life when the asphyxiating  
freezing light grows midwife and steals the last resort  
for maggots of the sane

Now we're silently defending our world and fragile  
veils of dark to keep us safe

We stray in search of false "Diminished Master"  
blindfold ourselves to see the most and so we fail  
drowning deep in faint lies the maze we've seen before

Mind pulse blown away with the wake souls innards  
ripped out steaming stinking with the dark bluish mist -  
unveiled mystery of Life and Death... hhh go fuck your  
own pride worm and rot on

Can't survive the sunrise can't keep your poor "sanity"  
you now have the Box open see all your fears and pains  
and whatever loose  
Haunting you chasing you preying you until the next  
sunset do you really hope to get to it alive?

CRAWL whine and writhe with cut off mental strains  
NOW CRAWL  
Breeding scorn that falls upon your filthy dying realms  
Within your sick imagination's womb  
Begotten well-constructed thoughts NOW clearly  
Reveal chaotic fault you knew as life

DAWN  
The chrysalis is broken dissolved in acrid breath of sun  
DAWN NOW  
We silently surrender our fight and fragile veils of dark  
would never keep us safe
