When the white bird flies From your heart to mine I
surrender every part of me To the tenderness Could it
be the wine In your eyes, stars shine And I'm feelin' like
a child again It's taken me a little time To find words to
say Stay, make this forever And lay love in my life
Come what may Cherish each moment of love As
dreams go by The trees and the towers are burning
Fear walks on the sea My soul in the wasteland is
yearning What does tomorrow hold for me? What can I
say Just that I need you With you here by my side We
can turn even the desert Evergreen As dreams go by
So won't you stay, make this forever And lay love in my
life Come what may Cherish each moment of love As
dreams go by
