

Going Second

"A Place Away"

Visit "[A Place Away](#)" on MotoLyrics.com

The stars made your eyes glaze
A sparkle that was never meant to fade
Existence, so intense, dancing there
And never stops to play
I wanna go right now into your world
I close my eyes and make believe
This time I'm hurled away from you

This space between us is never ending
Don't walk away right now
The space between us is never ending
Please show me how

I wanna go there with you.
A place away from now
We'll step into the darkness
A place you've never known
It's not like where you thought
You'd ever wanna go
You would never go there
You're not here with
You're not here with me
