He'll say it's okay and don't be afraid
You'll see what you can be
You control this world around you
Everything's around you

Watch out girl this world is falling
Eyes closed the night is calling
Come on now don't be stalling
Watch out girl
Can't you see his lazy pretense
You know he doesn't care
Right now this doesn't make sense
Watch out girl, it's falling down

He'll say, take your time
And you'll always be by his side
And there's no reason or rhyme
You control this world around you
Everything's around you

Look inside and you will see
This won't make you happy
Stop right there, it's time to go
Save yourself the misery
