Yesterday you killed me
Today I'm only a moment away
You can never escape this
Can't annihilate what you never can see

This is no dream
It is for real
He rules your life

Now hear the sound of tranquillity
The siene roars so load in your head
Never again you can sleep
Cause the fear is only second away

This is no dream
It is for real
He rules your life

Create it all in your mind
Althought it feels like deception
Consider it's the end of this world
You can't determine it's destiny

This is no dream
It is for real
He rules your life

Create it all in your mind
This thought will hurt you
Like poison it runs through your senses
And beyond
