I figured out the problem  
yea the problem is you  
you didn't see us comin' now there's nothin' you can do  
times are gonna change, change or step aside  
it's my point of view that took you by surprise  
the sun's comin up yea the new dawn arrives  
a new generation standing stand with anger in their  
eyes  
no love in the city because there's no connection  
been stricken with disease a racial infection

I'm a battering ram comin' through to you  
in every alleyway on every avenue

actions could erase all the fear that we suffer  
people segregated no one understands each other  
he's a different color but we're the same kid  
I will treat him like my brother he will treat me like his  
well an eye for an eye yea a tooth for a tooth  
brother against brother should be singin' with the  
group  
the inner cities burnin' yea it's screamin' black and blue  
the power and the passion of a million youth

I'm a battering ram comin' through to you  
in every alleyway on every avenue

I figured out the problem yea the problem is you  
you din't see us comin' now there's nothin' you can do  
he's a different color but we're the same kid  
I will treat him like my brother he will treat me like his  
all the blood that spills of all the guts that fly  
the media paints a picture that stands  
pits dogs against cats now who is responsible  
the power in the issue  
the force is unstoppable

I'm a battering ram comin' through to you  
in every alleyway on every avenue
