The Vesta is landing
The Vesta is landing
Without a captain, without a crew
Dead in the hull, tied to the wheel
This ship of death, this ship is filled with rats
You better find your mother
You better look for cover
We make a choice, we make it everyday
To get up in the morning and to bear away
You better find some cover
You better outlive your mother
You better find some cover
This ship of death
This ship has a new captain
This ship is landing
We don't need a doctor
We need a sacrifice
We need a sacrifice
You better hide your babies, until the morning
We make a choice, we make it everyday
To get up in the morning and bear away
You better outlive your mother
You better outlive your mother
You better outlive your mother
Turn up the lampposts, stay out of the shadows
This is a plague like no other
We need a martyr, we need a victim
We need a sacrifice
Pray before sundown, send your children to grandma's
Nail a cross to the door
Bear away
