[Originally by Refused]

genocide on genocide - destroyed knowledge crushed
pride
lost culture to civilization - reduced abused beyond
dignity
contemplation exploitation - ring the bell of information
blocked the truth convincing, controlling - held us down
unthinking, unknowing
oppressed so many for so long - we've ignored the
facts, and moved along
we gotta pump the brakes
wasting resources, face some facts and detect the
causes - cause our progression equals
destruction, people getting killed by government
corruption
cause making most of the land, that's the plan, you
gotta understand
that 50 years down the line, there wont be no time, the
time is now.
drained so much for so long - we've ignored the costs
and moved along
time to pump the brakes
gotta pump the brakes, pump pump the brakes...
