Den! Sometimes the jokes dont seem to work. You didnt understand me right, it seems to me when it aint got objectivity in sight. One could easily understand the message that i projected aint so fucking serious. I thought that you'd detect that. Now you know the conspirical intent. Im sick and tired of answering questions of what i meant, Though there are parts of your ideas with i cant agree; I t wasnt an attack on your integrity. It seemed important to explain once again but all in all it is just words!
