This whole system where freedoms marked as cash,  
made for and by the established, it equals white male  
upperclass. Instead of make our resistant evident  
speak out and then strike back. We make the bastards  
stronger when we are quite and bust our ass. When the  
corporations own everything it makes us easier to  
control. and then what about the opposite gender,  
complexion they have it harder even now, Will they  
count at all? Instead of equality we get bigger gaps,  
instead of freedom we get cash. Instead of putting our  
mouth where our heart is and cut the leash, we attach.  
This time it's a part of society, this time there is a  
certain enemy. This time there isn't any body else. This  
time i will put the blame on no one but the white male  
upperclass. This whole system custom made for such  
pigs as the ones who got a lot of money but still dont  
have to pay more tax. When it comes paying the taxes  
they claim that one size fits all, but the low income  
earners get x-large size and the capitalists get small.
