Wow, it came down upon us and it spread like the rats,
I can't seem to remember saying O.K. to that.

We're supposed to stand by and watch the swine grow fat,
No way I would've agreed with that!

We shall have no other god than the new economy,
But don't you believe there's gonna be room for you
and me.

We must have found a way of making money for free,
They call it alchemy, but I call it fucking robbery

Maybe the sun will rise and the grass will grow,
I just thought, I just thought I'd let you know
If this is only gonna be about win or lose, win or lose,

Then may I please be excused

Well it's here to take over you may rest assured,
Unless you make yourself heard, stand up and tell
them to stop!

But it won't be stopped easily,
No it won't even slow down for a little democracy

Maybe the sun will rise and the grass will grow,
I, I, I, I just thought I'd let you know
If this is only gonna be about win or lose, win or lose,

May I please be excused

If we still don't recognize who's being used, who's
being used,

May I please be excused
