It grows inside I feel again  
So long was night, But nights do end  
It seemed so far, In all those years  
The silent that held me, those silent tears  
But I've survived, I can rise again  
Facing the failure that defeats me within  
The Failure that defeats us within

Le nostre voci sono importanti  
Essi dire molte, a si  
Il tempo no il nemico, a si  
Che cosa e, sta perdendo la sogni  
We fall and we rise again  
We fall and we rise again

I see the lights in the smaller space  
I see it gets brighter every and each coming day  
Stay with the heart and stay with the dream  
No matter the challenge that comes between

Il tempo no il nemico, a si  
Che cosa e, sta perdendo la sogni  
We fall and we rise again  
We fall and we rise again
