Baby watch your back Baby watch your back ... I
watched you come and go and never noticed Like daily
papers, faces, knick-knacks But now I've seen you And
you are my focus Baby watch your back I went my days
and nights Not knowing of you But now you fill my
every minute And I can't stop myself for my thoughts
Of you are infinite I watch you You hate me I don't like
you But I want to have your baby You ain't got no soul I
don't really get you You ain't got no soul Like I've never
met you [chorus] You ain't got no soul But I'm gonna let
you in For a big surprise Baby watch your back Baby
watch your back Watch out Now you walk down the
street and I follow Wearing my wig and funny glasses
And I will follow you wherever you go Baby watch your
back I'll catch you one day in the rain or the fog And
then you'll realize how I care And I'm invincible for I am
like smog I'm everywhere I touch you I feel you I brush
you Soon I'll steal you [chorus] Baby watch your back!
