"To Breathe"

Visit "[To Breathe](#)" on MotoLyrics.com

It's just amazing how I don't make mistakes
Seems everyday I'm waiting to see the look on your
face
This days' been coming I wait for way too long
Will anyone here miss you when you're gone?
Please don't be afraid
I've come to save everything that makes you think of
me
I feel everything
I could not wait
You have made it just impossible to breathe
I have this something here that I can't explain
You have the worst of something that I'll take away
You don't need to hear this humming inside your brain
I'll take this whisper from you before you look away
Please don't feel ashamed
There's love you gave somewhere deep inside your
mind
I feel everything
I could not wait
You have made it just impossible to breathe
Please don't be afraid
I've come to save everything that makes you think of
me
I feel everything
I could not wait
You have made it just impossible to breathe
