(Ray Price)

When your alone at night with the world locked outside

Have a talk to your heart about me

And if your told that it's right that we stay apart

Then let me come in and talk to your heart.

--- Instrumental ---

Believe you me there will be happiness

When you open your door and let me come in

And if your told that it's right that we stay apart

Then let me come in and talk to your heart.

--- Instrumental ---

Lovin' you changed my life in just one day

So talk to your heart and what does it say

If your told that it's right that we stay apart

Then let me come in and talk to your heart.

--- Instrumental ---

So talk to your heart if it can't decide

Remember my own is waiting outside

Yes, it's waiting outside alone in the dark

So let me come in and talk to your heart...
