When I picture your face before me I just see a scar
Yes I know when I swallow this medicine in the dark
When I picture your face before me I just see a scar
Yes I know when I swallow this medicine in the dark

I was staying with you forever despair is in your heart
Yes I know when I swallow this medicine in the dark
Yes I know when I swallow this medicine in the dark

When I picture your face before me I just see a scar
Yes I know when I swallow this medicine in the dark
When I picture your face before me I just see a scar

Where? Where do I go from here?
When everything is just fine and all I want is right here
at my feet
Please, some kind of release
I need something now to knock me off my feet and
then pull me back up
Right now before the fire's out I'm not quite done, so
come on
Yeah

I was staying with you forever, despair is in your heart
Yes I know when I swallow this medicine in the dark
Yes I know when I swallow this medicine in the dark

Yes I know when I count my own hair in the dark
Yes I know when I count my own hair in the dark
