Take out your whip and give me the pressure I crave  
put on your leather and beat me until I behave  
woman, you know that I love to be punished by you  
how take off your clothes because know it's my turn to  
be cruel

Dominate, dominate  
welts all over my chest  
discipline, discipline  
baby, your pain is the best

Inflict me with bruises and watch as I scream with  
delight  
humiliate me, I last for your violence tonight  
kiss me, then hit me, then tease me, then boss me  
around  
my body is aching with lust so we'd better get down  
Hurts good.

Back at your apartment you turn out your lights  
light a few red candles, I'm gonna spend the night  
you tie me to your bed with rope, you've got some  
heavy chains  
I'm getting ready for some love that's painfully insane  
my clothers are gone, the candle wax is dripping on my  
chest  
your fingernails into my flesh, you put me to the test  
I love the fire in your eyes, I wanna be your slave  
tomorrow I'll be feeling all the pressure that you gave
