Don't call me before 11 o'clock  
There's a new girl on the block  
She's really dark and she's  
really built  
And I'll take her without guilt

New girl on the street  
The kind you want to meet  
She's the one for me  
Whoever she may be

We're going out and we're  
getting loose  
Just me and her it's the truth  
Just a little time, she will be all mine  
Everything will turn out fine

New girl on the street  
The kind you want to meet  
She's the one for me  
Whoever she may be

We take a cruise, she says hold on tight  
Just take it easy you will feel alright  
Really slow and she takes her time  
It's driving me out of my mind

New girl on the street  
The kind you want to meet  
She's the one for me  
Whoever she may be
