"Shorter Breaths"

Visit "[Shorter Breaths](#)" on MotoLyrics.com

Filling in anomic spaces to first light
Tremble and centre
The dimly lit bliss between us
Building new myths in our mind

There's just not enough music to collect all this
Feeling... so closer to everything

The discovery we needed draw your breath

Hold it for longer
This is the part of life
So separate from the rest

Because no matter how long it feels
Weather will always grow warmer
Feelings calmer
Breathing shorter
So hold closer now
