All you have to do is look at me
You just look at me and I melt
I feel my body trembling.
The vibrations run throughout
Chorus:
I shiver when you touch me
'Cause when you do
There's so much heat
It seems too much
How can anyone deny the fire
When together we spontaneously combust
You look me in the eyes
And my mind is overcome
And you leave me wanting more
Before it's even begun
Chorus
Ooooh, we're playing with fire
Ooooh, we better keep it down
Mmm, we're starting to ignite it
We're burning from inside out
Yeah, we're burning from inside out

Chorus
