I open my eyes
A new reality
It's filling the sky
Full of ambiguity
I feel it inside
It's growing on me
Oh I try to control
But it's spreading the disease

There's a rush in my head
There's nothing that holds me still
There's a rush in my head
I'll stay and watch it all die

Impact
What the fuck is going on

And everything's reversed
So god-damn inverted
And I feel pathetic
Like the scum of humanity
And I breed the hollow
And I taste the swallow
The disease
What the hell is going on

There's a rush in my head
There's nothing that holds me still
There's a rush in my head
I'll stay and watch it all die

Impact
What the fuck is going on

Be my guest and watch us all die
Impact
