The noise wake me up from a long coma period
Gestation time is completed

Injected with electronic parasite-bugs
Radioactive nails hammered down in my chest
As the charged particles glow
In a momentary, ephemeral moment of glory

Everyone looks insane...
The lights flash and the world is spinning around

The rust corrodes inside my body
Machinery fed cells
Symbolizing the great collapse of flesh
And the immortalization of the soul

My brain caves for bloodshed
Fuck you yeah, my mind's freaked and out of control
Unresting the drive to kick the shit out of you
I won't rest until I rip you down

Everyone looks insane...
The lights flash and the world is spinning around
Spinning around... spinning around...

I won't rest until I wipe you and your beautiful eyes out
of the surface

Murder - everyone looks insane..
Pain - everyone looks insane...
Murder - everyone looks insane..
Pain... deviation
Murder - everyone looks insane..
Pain - everyone looks insane...
Murder - everyone looks insane..
Pain... genocide
The lights flash and the world is spinning around
