Texas Will Dream - He Said, She Says.

(Verse 1)

She says hold on just a minute now, I need to get this, I
need to get this feeling right.

So as I think of all the words to say, you know I do
anything just to see you smile.

What I never realized that, Texas was so far away. So I
took the time to write this down,

And I hope some how it will reach you some way, some
how.

(Chorus)

I want to be the sun in your bright blue sky, I want to be
the moon you sleep under every night, and I'll try my
best to shine my brightest, I'll be your light through all
your darkest fears, and we both know that Texas will
dream tonight.

(Verse 2)

She says she's lost the feeling that she once had, but
I'll do anything just to give it back. You know I spend
most of time, trying to catch my own reflection in your
eye.

(Chorus)

I want to be the sun in your bright blue sky, I want to be
the moon you sleep under every night, and I'll try my
best to shine my brightest, I'll be your light through all
your darkest fears, and we both know that Texas will
dream tonight.
